Laura,

Thanks! I will give you a call if I have any questions.

Regards,

Lee

Hi Lee,

I am forwarding you some slides from Rusty Wasem who is the Review Manager for the rodenticides. The Risk Mitigation Decision (RMD) is not a rule, it is a document that presented the Agency's decision regarding risk mitigation measures that were necessary for the rodenticide products to meet the Agency's safety standard. Most registrants modified their products to incorporate the mitigation measures, but there are a few products which we need to pursue cancellation.

Basically for pest management professionals, most of their uses are not affected by the RMD. There is a change that affects some PCO's in that we replaced the language "in and around structures" to say "within 50 feet of buildings". As a result, PCOs cannot bait around fencelines and dumpsters that are not near buildings.

Laura,

Can you please send me a few slides on the rodenticide rule and what it means for pest management professionals?

I have an up coming presentation for large audience in the pest management applicator industry. I was asked to touch on some key issues.

I am hoping you already have something.

Regards,

Lee
